Noelle,  
Have you received the revised budget from Cadmus? We have a tentative deadline to modify purchase orders by August 25, so in the event we need to add funds above the \$27,000 (from our IGCE) I'm hoping to complete the negotiation process ahead of this date.  
Thank you.

Bruce Suchomel

Dear Noelle and Lisa,

The stop work date is approaching for WA 2-94. We understand that you are reviewing our revised budget at this time. Due to the schedule of the work under this work assignment, is it acceptable for Cadmus to continue working under this work assignment over the remaining weeks of August prior to receiving work plan and budget approval?

Sincerely,

Joel

**Subject:** EP-C-15-022 WA 2-94: Work Plan

Hi Joel:

The EPA intended for subject work assignment to be highly administrative, requiring simply categorizing public comments from the proposed Dewey-Burdock in-situ mining permit. The Cadmus work plan and budget calls for an extraordinarily high number of P4 hours which the EPA did not expect to be needed for this type of effort. Even if a

comment is highly technical in scope, Cadmus need only place it in the proper category, not analyze it. Any difficulty in the categorizing process should be brought to the Region 8 WACOR's attention. Region 8 will analyze and evaluate the comments and reply to them. The WACOR's understanding is that all of the work to date has been done by P1 personnel which is in line with the administrative scope of the effort, but not necessarily in line with what is reflected in the current proposed work plan.

With this clarification on project assumptions and expectations, request that Cadmus review the current work plan and provide a revised budget by COB Monday, August 14, via FedConnect. Any questions, please let us know.

Thanks,
